Wedding Package - Large

The third package encompasses all that is in the Medium Package from meeting the bride at the place she leaves, through the ceremony with the addition that the photographer will remain at the reception in order to capture pictures during the speeches and some of the

revelry. This should also include the real cutting of the cake and sometimes the bride throwing her bouquet to the waiting maidens.

During this time there is the opportunity to take candid photographs which can provide some very funny and unusual images to make you smile many years later.

The result of this extra activity is that the package now comes out in the region of one hundred photographs for the album.

Additional items can be ordered at later dates such as enlargements, canvas prints, gifts and even a DVD of the photographs set to music.
